Claim 1. (Amended) An interface having means for presenting
items for selection by a user of a data processing
system, and having means for executing the [selected]
items which are selected, said interface comprising:

means for representing a plurality of interface

objects in an object database; and

means for dynamically associating different ones of said interface objects [into] with a plurality of logical frame presentations based upon [the] data within each of said different ones of said interface objects.

In Claim 4, line 1 delete "2", and substitute therefor --3--.

In Claim 5, line 2, after "the", insert --interface--.

In Claim 5, line 3, after "said", insert --interface--.

In Claim 5, line 4, delete "the".

In Claim 11, line 2, delete "constructed".
